

Engineers

Engineers work across diverse disciplines and global projects, often facing complex legal and technical challenges. That's why they need more than standard professional indemnity. Our modular policy is designed to address the specific risks engineers face, offering flexible, targeted cover that adapts to the varied demands of the profession—whether working locally or internationally, on routine tasks or specialist projects.

At a glance

Full civil liability

Our policy offers full civil liability coverage and cover costs incurred by attending court sessions in relation to a claims or loss case covered by this policy.

Breach of contract cover

Clear, unambiguous cover for breach of a client contract. Covers sums legally obliged to pay as a result of a claim by a client made against you, including liability for claimants' costs and expenses.

Full pollution liability

This feature covers both sudden as well as accidental and gradual pollution—critical especially as environmental regulations become stricter and more complex.

Intellectual property rights infringement

Our policy covers costs associated with copyright and trademark infringement claims brought against you, including legal costs, damages and settlements.

Withheld fees

Claims can quickly spiral out of control, that's why our policy includes reimbursement of costs incurred to help reduce or avoid a claim, and the payment of fees withheld by an aggrieved client if this mitigates a potentially larger claim. We also provide cover for claims brought under a collateral warranty.

Liability combined package

Our policy includes a comprehensive package of coverage including professional indemnity, public liability, products liability, employers' liability, cyber & privacy, cybercrime, property, business interruption, D&O and legal expenses.

Cyber liability cover

Businesses holding sensitive data can be a target for cyber attacks and cybercrime leading to data loss, privacy breaches, and reputational damage. Our network, privacy and cybercrime cover protects against cyber claims including ransomware and theft of funds.
